

Year 6 Term 6

There are so many ways to communicate: text messages, blogs, emails and podcasts. Which do we prefer?

During this half term, we'll interview a web designer or blogger, investigating the process their work goes through. After looking at a range of blogs and emails, we'll write a letter to our headteacher to ask if we can create a class blog. We'll learn about the history of computing, which surprisingly goes back 6000 years to the Antikythera mechanism, and find out how optical fibre cables are used. Through further exploration of modern technology, we'll learn about some of the amazing people responsible for its development. In our ICT work, we'll investigate how to decide whether a website is trustworthy and what malware is. We'll write a thriller based on exciting technology and learn about how robots can help us. We'll explore how to write an algorithm and how to keep safe online. Then, we'll listen to and download music and create a mock-up website. We'll learn all about lasers, and make periscopes and complex circuits. We'll investigate robotic toys and make our own.

English	Email and blogs; Newspaper reports; Websites; Thriller narratives; Podcasts
Science	STEM Projects
History	History of computing
Computing	Online research; Computer networks; Algorithms; Logical reasoning; Downloading music; Website design
Art & DT	Beatriz Milhazes

Help your child prepare for their project

If the world today relies so heavily on technology, what will it be like in 'tomorrow's world'? Why not go on a technology hunt to locate computerised and robotic devices in your home? You could also create a survey to find out how much time your family and friends spend using technology each day. Alternatively, go online to research a significant figure in the computing world. What did they discover and how did this influence our daily lives?
